

MM 500 MECHANICAL ENGINEERING TEST SERIES

This is a bench top set for studying various principles in Mechanical Engineering. It consists of a basic panel for mounting accessories for specific experiment. There are over 20 optional sets of accessories for over 60 experiments.

MM500-171 BAR LINKAGES SET

DESCRIPTION

This is part of MM 500 mechanical Engineering Test Series which provides sets for various experiments on MM 500-100 Basic Panel (separately supplied) to study or demonstrate specific engineering principles. The set is supplied in plastics box.

Over 20 perforated bars of different lengths and joints are used for assembly to form different linkages. The bar can accommodate a pen to trace the movement of the linkages on paper.

TYPICAL EXPERIMENTS

- Four bar linkages.
- Straight line linkages.
- Pantograph.
- Ackermann steering.

MAIN COMPONENTS AND PARTS

- Bars with holes of different lengths, fixed joint attachment, movable joint attachment, pencil holder, screw driver and wrench and plastics box.
